

VerseBikes Mobility Solutions

Empowering the Future of Urban Mobility.

Reliable, maintainable, and designed for real use.

We Build Reliable Long-Term Bicycle Rental Systems

VerseBikes develops fleet-ready bicycle systems and digital tools that help organizations operate their own long-term rental programs.

We provide the hardware, software, and know-how
— you keep full control.

Complete Turnkey Solutions

Fleet-Grade Hardware: We design, manufacture, and support fleet-grade bicycles, parts, and accessories built for everyday use and low maintenance.

Local Service Setup: We enable your operations by providing local service setup, partner training, and complete documentation.

Connected Software: Our platform includes a powerful Admin Dashboard for fleet management and an intuitive User App for riders.

Rollout Consulting: We provide expert consulting for program design, rollout, scalability, and regulatory compliance.

Why Long-Term Rental?

It bridges the gap between ownership and sharing. It's the structured, accountable, and sustainable model that organizations prefer.

Aspect	Short-Term Sharing	Long-Term Rental
User	Anonymous	Assigned & responsible
Maintenance	Centralized	Local partner network
Street Impact	Cluttered	Controlled hubs
Cost Per Trip	High	Predictable
Lifecycle	Disposable	Circular & traceable

Hardware & Software Ecosystem

Fleet Hardware

All models share modular components and cross-compatible parts for simplified operations.

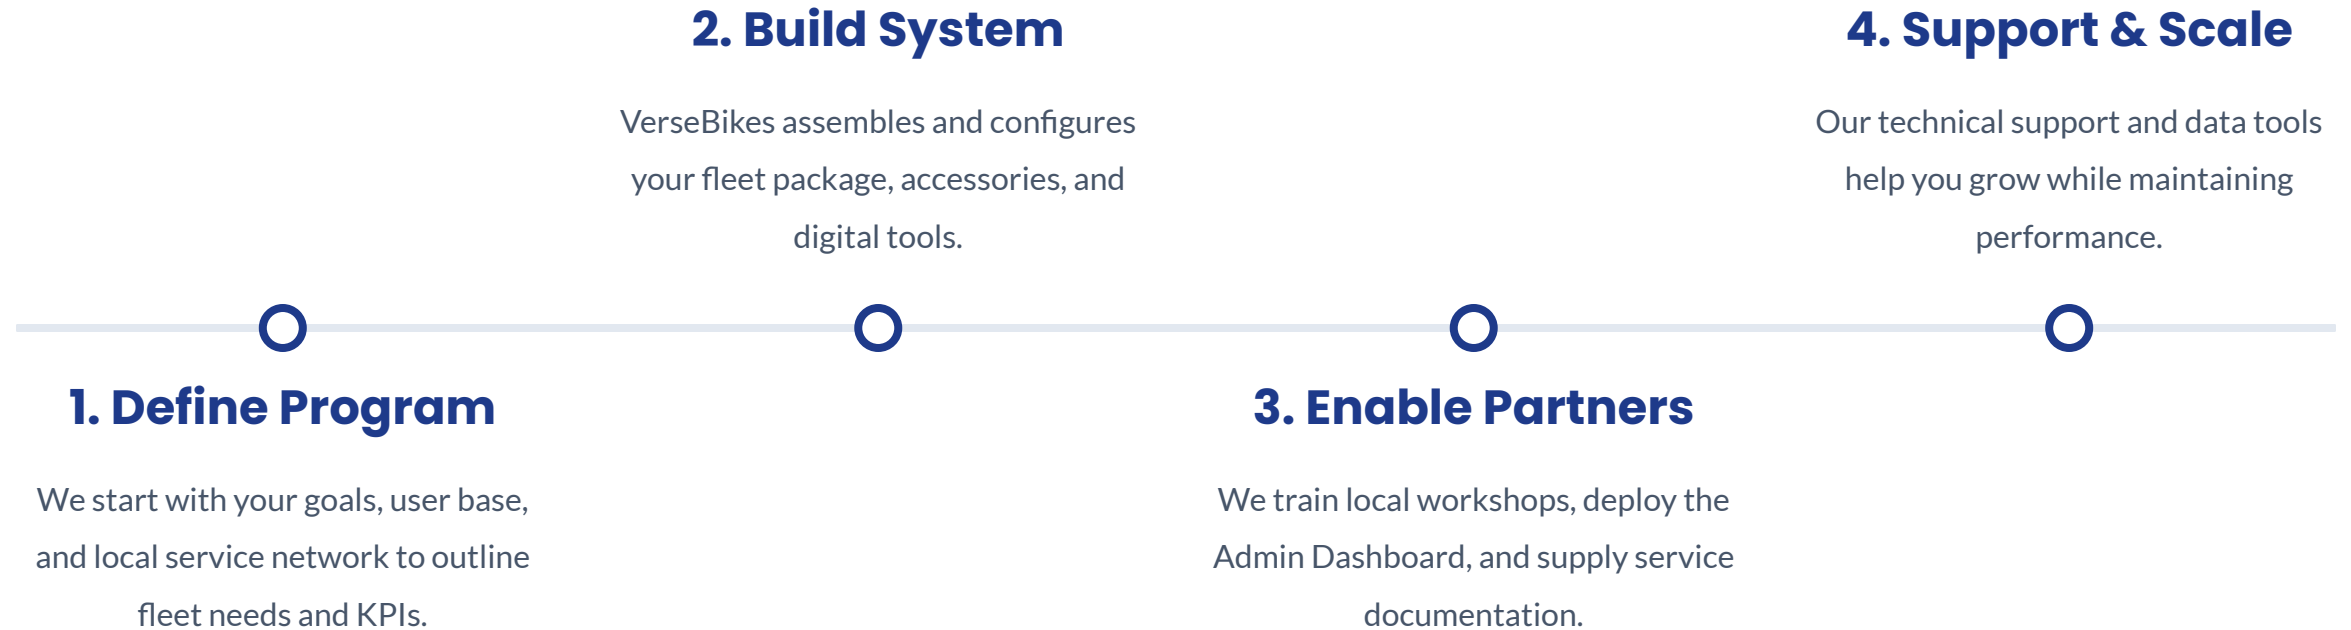

- **Metro City:** Reliable commuter e-bike
- **Metro Delivery:** Reinforced for high-load use
- **Metro Cargo:** Heavy-duty logistics platform
- **Metro Lite:** Non-electric for entry-level

Connected Software

A complete ecosystem designed for scalability and easy integration.

- **Admin Dashboard:** Real-time monitoring, repair tracking, usage analytics, and KPI dashboards.
- **User App:** Rider registration, payments, rental extensions, navigation, and service notifications.

How It Works: Our 4-Step Process

Software Ecosystem Deep Dive

Admin Dashboard

- Fleet health overview
- Maintenance scheduling & tracking
- Real-time telemetry and alerts
- Usage reports and route heatmaps

User App

- Intuitive onboarding and digital ID
- Subscription management & payments
- Built-in navigation and support
- Push notifications for service/renewals

Partner Enablement & Training

95%
Uptime with Certified Partners

Reliable Partners, Reliable Fleets

A reliable program depends on reliable partners. We provide complete documentation and hands-on training for local service teams.

- Workshop setup guides and tooling lists
- Maintenance protocols & inspection checklists
- Battery and parts handling procedures
- Fleet performance audits & KPI templates

With certified partners, uptime stays high and repairs are completed in under **48 hours**.

Sustainability & Circular Lifecycle

**“ We design for repair-first, not
replace-fast. That’s how real circular
mobility works. ”**

— The VerseBikes Lifecycle Promise

Who We Work With

Cities

Develop public rental programs with clear SLAs and verified data.

Universities

Offer semester-based mobility access for students and staff.

Employers

Introduce bike rental as a company benefit or shared corporate fleet.

Logistics

Deployment for last-mile and utility transport.

Let's Build Better Fleets

Tell us what you need, and we'll prepare a tailored setup with recommended bikes, software, partners, and pricing.
