01 ABOUT VERSEBIKES

At VerseBikes, we develop and manufacture premium electric bikes for B2B partners who demand more: more control, more customization, and more quality. We're an independent OEM based in the Netherlands, offering full-scope design, engineering, and production capabilities for businesses across Europe and beyond.

Our goal is simple: to help you launch, scale, or differentiate your e-bike offering with production-ready platforms that combine cutting-edge engineering, design flexibility, and consistent quality.

Mission

To empower bike brands, mobility providers, and fleet operators with customizable, high-performance e-bike solutions built for today's dynamic market.

Vision

To become Europe's most agile and design-forward OEM e-bike partner, enabling the next generation of two-wheeled electric mobility.

We work with top-tier suppliers, and experienced production partners.

VERS e-bikes are designed and assembled in Europe, offering robust design quality, flexible configuration options, and dedicated engineering support. As your OEM partner, we help you reduce development time, control costs, and launch bikes that fit your brand and market strategy.

02 URBAN COMMUTERS

NIMBUS

The NIMBUS is a compact e-bike designed for the urban commuter looking for a space-saving, lightweight solution. Perfect for city environments, it offers easy storage and maneuverability without compromising performance. Ideal for short commutes and quick errands, the NIMBUS is a versatile mobility option for crowded urban spaces.

- **Frame Size:** 35 cm
- **Rider Height:** 140-180 cm
- **Weight:** 15 kg

Configurations

- **Essence:** Features 20"x1.5" tires and a belt drive for a smooth, low-maintenance ride, ideal for everyday commuting.
- **Momentum:** Equipped with a chain drive instead of a belt and a PAS sensor, offering a cost-effective solution while still delivering responsive performance.
- **Ultimate:** Includes the premium Gates belt drive and a PentaLock security system for maximum security and high performance, ensuring a smooth and secure ride.

NOVA

The NOVA is a highly adaptable urban e-bike, designed for riders who need a reliable and efficient ride across the city. With a sturdy frame, comfortable seating, and efficient motor, the NOVA provides an effortless commuting experience, combining style and practicality for everyday urban mobility.

- **Frame Size:** 38-58 cm
- **Rider Height:** 145-200 cm
- **Weight:** 17-18 kg

Configurations

- **Essence:** Features a hub motor, 26"x1.8" or 28"x2.0" tires, shimano brakes and a single speed belt drive for smoother, quieter rides, providing a mid-range option that balances performance and affordability.
- **Momentum:** Includes a chain drive and solid stem for a reliable and cost-effective commuting solution.
- **Ultimate:** Equipped with a Gates belt drive and G3ARED gearbox, offering superior performance, shifting precision, and long-term durability for serious riders.

03 TREKKING COMPANIONS

LUMA

The Luma was created specifically for shorter riders who want a bike that fits perfectly and performs effortlessly. Its compact frame design make it easy to get on and off, with the shorter handlebar reach and seattube length providing a great geometry for shorter riders.

- **Frame Size:** 38 cm
- **Rider Height:** 145-170 cm
- **Weight:** 23-24 kg

Configurations

- **Essence:** Equipped with a mid-drive motor, Shimano Nexus hub, 26"x2.3" and belt drive, this model ensures a dependable and smooth ride, making it ideal for mixed-terrain cycling.
- **Momentum:** Designed for casual riders, this version pairs a Shimano Nexus hub with a chain drive, delivering a cost-effective yet comfortable riding experience.
- **Ultimate:** Featuring a Gates belt drive and Enviolo gearbox, this model offers a high-end, low-maintenance solution with seamless shifting, perfect for tackling diverse terrains.

VERO

The Vero E-Bike is built for speed, comfort, and style. Its lightweight frame makes it easy to handle, while the high-performance motor ensures you get the most out of every ride. Whether you're commuting, cruising, or exploring, the Vero gives you the freedom to go farther and faster.

- **Frame Size:** 48-54 cm
- **Rider Height:** 160-200 cm
- **Weight:** 23-24 kg

Configurations

- **Essence:** Comes with a Shimano Nexus hub, 27.5"x2.3" tires, belt drive, and mid drive motor delivering a reliable and comfortable ride for mixed-terrain use.
- **Momentum:** Features a Shimano Nexus hub, chain drive, providing a smooth, budget-friendly option for casual riders.
- **Ultimate:** Upgraded with a Gates belt drive and Enviolo gearbox, offering a premium, maintenance-free experience with seamless shifting for varied terrains.

04 PERFORMANCE EMTB'S

NOMIS

The Nomis is a commuter e-mountain bike (eMTB) designed for those who want to blend urban commuting with off-road adventures. It features a powerful motor, enhanced suspension, and rugged tires, allowing riders to easily tackle city streets and rougher terrains in one seamless ride.

- **Frame Size:** 45cm
- **Rider Height:** 150-190 cm
- **Weight:** 25-26kg

Configurations

- **Essence:** Features a mid-motor, 27,5"x3.0" tires and Shimano 11-speed gearing providing a reliable and efficient ride for both city streets and light trails.
- **Momentum:** Comes with a hub motor and Shimano 11-speed gearing, offering an affordable option for smooth rides through mixed environments.
- **Ultimate:** Includes a Pinion gearbox and Gates belt drive, delivering superior durability, performance, and a smooth, maintenance-free experience for both urban and off-road rides.

SOLARA

The Solara is a fat tire eMTB that's built for tackling all types of terrain. From rugged trails to snowy or sandy paths, the Solara is equipped to handle it all. With its oversized tires and powerful motor, it delivers exceptional stability and control, perfect for those seeking adventure off the beaten path.

- **Frame Size:** 45 cm
- **Rider Height:** 150-190 cm
- **Weight:** 28-29kg

Configurations

- **Essence:** Comes with a mid-motor, 26"x4.5" tires and Shimano 11-speed gearing offering a reliable and efficient ride on various terrains.
- **Momentum:** Features a hub motor and Shimano 11-speed gearing, providing a budget-friendly option for off-road explorers.
- **Ultimate:** Equipped with a Pinion gearbox and Gates belt drive, this configuration delivers the highest level of performance for tackling rough terrain and off-road adventures.
